

You can, with the same starting position, also play the variant game **Gunzi GoGo**

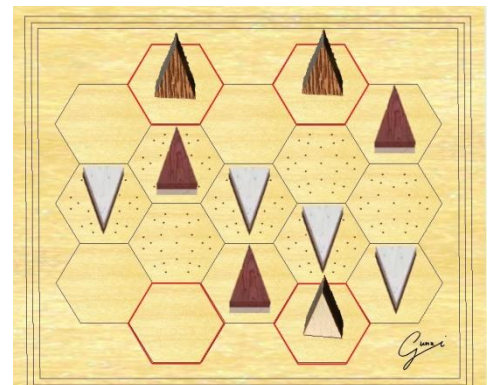

Gunzi GoGo has the same rules as Gunzi Slowgo, but in this game you can also win, when you are the first who established two GoGo's

A GoGo you establish when one of your wedges manage to reach one of the two most distant (red marked) fields on the other side of the board. Your wedge is placed with its point up and is called a GoGo.

In this game you can win in two ways:
Or you make that your opponent can't do a SlowGo

Or you are the first who has established two GoGo's like black in the drawing alongside.

Black wins
